

North Stand, Old Trafford

PDS1005

Who:
Manchester United Football Club

Where:
North Stand east and west quadrants

What:
Stormwater attenuation system

Specifier:

Main contractor:

LAING O'ROURKE

Drainage contractor:

Project details

Project requirements:
High capacity drainage using large diameter tanks.

System cost:
£35,000

Key criteria:
Drainage efficiency of access areas around stadium, minimum effect on busy area used by other essential services, plus cost of system and ease of installation.

Solution achieved:
Rerouting existing drain network and installation of two tanks of over 350 cubic metres capacity without any disruption to other services.

Other benefits:
Tubosider design team worked with consultants' design team to produce the optimum solution.
