

Paradise Project

PDS1006

Who:
Grosvenor Estates

Where:
Liverpool

What:
Stormwater attenuation system

Specifier:
Willerby
LANDSCAPES

Main contractor:
LAING O'ROURKE

Drainage contractor:
BRIDGES POUND

Project details

Project requirements:
Multi-function system combining drainage and irrigation.

System cost:
Part of £10 million regeneration project.

Key criteria:
Bonus of using stormwater attenuation system to harvest, store, filter and feed back rainwater to save on separate irrigation system.

Solution achieved:
Simple 200 cubic metre tank fitted with control valve to maintain water for irrigation of 20,000 sq metres of landscaping.

Other benefits:
Own design team and accessories meant complete system was delivered on time with all the required fittings. Light weight and high durability made it easy and fast to install and extremely cost effective to the project and customer.
