

Traincare facility, York

PDS1002

Who:
First TransPennine Express

Where:
Traincare facility, York

What:
Stormwater attenuation system

Specifier:
SIEMENS

Main contractor:
SPENCER

Project details

Project requirements:
High capacity drainage using large diameter tanks.

System cost:
£70,000

Key criteria:
Functionality, vital to a facility providing train washing, interior cleaning, toilet servicing and refuelling for 51 brand new trains.

Solution achieved:
Two tank attenuation, one of 70 cubic metres with a separator treating up to 30 litres/sec, one of 360 cubic metres with two separators each treating up to 65 litres/sec.

Other benefits:
Competitive cost and availability, plus the flexibility to revise the design to meet access restrictions of low bridges around the site.
