

Dublin Airport

Who:
Dublin Airport Authority (DAA)

Specifier:
DAA and contractor

Where:
Dublin Airport, Ireland

Main contractors:
Balfour Beatty
Ireland

What:
Stormwater attenuation system

Project details

Project requirements:
Sixth and largest yet tank commission in ongoing development

Capacity:
550,000 ft³ (15,600 m³)

Key criteria:
High output project with tight schedules for pipeline and activation, requiring fast and efficient delivery and installation according to demanding Balfour Beatty safety guidelines.

Solution achieved:
Manifold of lightweight pipes totalling 5600 metres in length, half with a diameter of 2 metres and half of 1.8 metres.

Other benefits:
Green delivery - design in two diameters allowed pipe nesting, halving trucks required and saving 220 journeys.
